The Shotgun – A diverse platform

"Why should I use a shotgun ?"

- It is a well known tool in the Police & Military environment. Running a shotgun might seem easy, simple and sort of "ruck, aim, shoot", but it is not. Like any tool you need to learn the fundamental and the key principals for not only using it right, but getting the maximum out of it.
- A shotgun is an extremely diverse and adaptable weapon system, which has the ability to work in hunting, sporting or combat environments.
- Commonly the shotgun is used within short environment. The distance between you and the desired target might be quite short. With that said - speed awareness and muscle memory becomes the key for a successful end of the day.

We will teach you how to not only shoot, but literally become part of the tool.

Eli Feildboy

CEO PG – DE \ IL Instructor

Zdenek Charvat

CEO Hard Task – CZ \ EU Instructor

The Course – Goals

Strengths

- Developing a strong muscle memory & proper shooting stances
- Focusing on developing a thinking process for the shooter
